

## NEWS RELEASE

**For Release: Wednesday, May 21, 2014**

**14-860-ATL**

SOUTHEAST INFORMATION OFFICE: Atlanta, Ga.

Technical information: (404) 893-4222 • BLSInfoAtlanta@bls.gov • [www.bls.gov/regions/southeast](http://www.bls.gov/regions/southeast)

Media contact: (404) 893-4220

### **Occupational Employment and Wages in Charleston-North Charleston-Summerville, May 2013**

Workers in the Charleston-North Charleston-Summerville Metropolitan Statistical Area had an average (mean) hourly wage of \$20.25 in May 2013, 9 percent below the nationwide average of \$22.33, according to the U.S. Bureau of Labor Statistics. Regional Commissioner Janet S. Rankin noted that, after testing for statistical significance, wages in the local area were significantly lower than their respective national averages in 16 of the 22 major occupational groups including sales and related, construction and extraction, and computer and mathematical.

When compared to the nationwide distribution, local employment was more highly concentrated in 6 of the 22 occupational groups, including healthcare practitioners and technical, food preparation and serving related, and sales and related. Conversely, 12 groups had employment shares significantly below their national representation, including business and financial operations, production, and management. (See [table A](#) and box note at end of release.)

One occupational group—food preparation and serving related—was chosen to illustrate the diversity of data available for any of the 22 major occupational categories. Charleston-North Charleston-Summerville had 30,480 jobs in food preparation and serving related, accounting for 10.3 percent of local area employment, significantly higher than the 9.0-percent share nationally. The average hourly wage for this occupational group locally was \$9.95, significantly below the national wage of \$10.38.

With employment of 8,000, combined food preparation and serving workers, including fast food was the largest occupation within the food preparation and serving related group, followed by waiters and waitresses (6,530) and restaurant cooks (3,210). Among the higher paying jobs were first-line supervisors of food preparation and serving workers, and institution and cafeteria cooks, with mean hourly wages of \$15.29 and \$11.07, respectively. At the lower end of the wage scale were combined food preparation and serving workers, including fast food (\$8.60) and dishwashers (\$8.71). (Detailed occupational data for food preparation and serving related are presented in [table 1](#); for a complete listing of detailed occupations available go to [www.bls.gov/oes/current/oes\\_16700.htm](http://www.bls.gov/oes/current/oes_16700.htm).)

**Table A. Occupational employment and wages by major occupational group, United States and the Charleston-North Charleston-Summerville Metropolitan Statistical Area, and measures of statistical significance, May 2013**

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Charleston	United States	Charleston	Percent difference <sup>(1)</sup>
Total, all occupations .....	100.0%	100.0%	\$22.33	\$20.25*	-9
Management .....	4.9	4.4*	53.15	47.72*	-10
Business and financial operations.....	5.0	4.3*	34.14	30.32*	-11
Computer and mathematical .....	2.8	2.5*	39.43	32.82*	-17
Architecture and engineering .....	1.8	2.6*	38.51	33.91*	-12

Transportation and material moving.....	6.8	6.4	16.28	15.71	-4

\* The percent share of employment or mean hourly wage for this area is significantly different from the national average of all areas at the 90-percent confidence level.

<sup>1</sup> A positive percent difference measures how much the mean wage in Charleston is above the national mean wage, while a negative difference reflects a lower wage.

Location quotients allow us to explore the occupational make-up of a metropolitan area by comparing the composition of jobs in an area relative to the national average. (See [table 1](#).) For example, a location quotient of 2.0 indicates that an occupation accounts for twice the share of employment in the area than it does nationally. In the Charleston-North Charleston-Summerville Metropolitan Statistical Area, above average concentrations of employment were found in some of the occupations within the food preparation and serving related group. For instance, chefs and head cooks were employed at 2.6 times the national rate in Charleston. On the other hand, bartenders had a location quotient of 1.1 in Charleston, indicating that this particular occupation's local and national employment shares were similar.

These statistics are from the Occupational Employment Statistics (OES) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the South Carolina Department of Employment and Workforce.

OES wage and employment data for the 22 major occupational groups in the Charleston Metropolitan Statistical Area were compared to their respective national averages based on statistical significance testing. Only those occupations with wages or employment shares above or below the national wage or share after testing for significance at the 90-percent confidence level meet the criteria.

NOTE: A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

### Technical Note

The Occupational Employment Statistics (OES) survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. Guam, Puerto Rico, and the Virgin Islands are also surveyed, but their data are not included in the national estimates. OES estimates are constructed from a sample of about 1.2 million establishments. Forms are mailed to approximately 200,000 sampled establishments in May and November each year for a 3-year period. May 2013 estimates are based on responses from six semiannual panels collected in May 2013, November 2012, May 2012, November 2011, May 2011, and November 2010. The overall national response rate for the six panels is 75.3 percent based on establishments and 71.6 percent based on employment. The sample in the Charleston-North Charleston-Summerville Metropolitan Statistical Area included 2,595 establishments with a response rate of 73 percent. For more information about OES concepts and methodology, go to [www.bls.gov/news.release/ocwage.tn.htm](http://www.bls.gov/news.release/ocwage.tn.htm).

The OES survey provides estimates of employment and hourly and annual wages for wage and salary workers in 22 major occupational groups and 821 detailed occupations for the nation, states, metropolitan statistical areas, metropolitan divisions, and nonmetropolitan areas. In addition, employment and wage estimates for 94 minor groups and 458 broad occupations are available in the national data. OES data by state and metropolitan/nonmetropolitan area are available from [www.bls.gov/oes/current/oessrcst.htm](http://www.bls.gov/oes/current/oessrcst.htm) and [www.bls.gov/oes/current/oessrcma.htm](http://www.bls.gov/oes/current/oessrcma.htm), respectively.

The May 2013 OES estimates are based on the 2010 Standard Occupational Classification (SOC) system and the 2012 North American Industry Classification System (NAICS). Information about the 2010 SOC is available on the BLS website at [www.bls.gov/soc](http://www.bls.gov/soc) and information about the 2012 NAICS is available at [www.bls.gov/bls/naics.htm](http://www.bls.gov/bls/naics.htm).

### Area definitions

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget.

The **Charleston-North Charleston-Summerville, S.C. Metropolitan Statistical Area** includes Berkeley, Charleston, and Dorchester Counties.

**Additional information**

OES data are available on our regional web page at [www.bls.gov/regions/southeast](http://www.bls.gov/regions/southeast). Answers to frequently asked questions about the OES data are available at [www.bls.gov/oes/oes\\_ques.htm](http://www.bls.gov/oes/oes_ques.htm). Detailed technical information about the OES survey is available in our Survey Methods and Reliability Statement on the BLS website at [www.bls.gov/oes/2013/may/methods\\_statement.pdf](http://www.bls.gov/oes/2013/may/methods_statement.pdf). Information in this release will be made available to sensory impaired individuals upon request – Voice phone: 202-691-5200; Federal Relay Service: 800-877-8339.

**Table 1. Employment and wage data from the Occupational Employment Statistics survey, by occupation, Charleston-North Charleston-Summerville Metropolitan Statistical Area, May 2013**

Occupation <sup>(1)</sup>	Employment		Mean wages	
	Level <sup>(2)</sup>	Location quotient <sup>(3)</sup>	Hourly	Annual <sup>(4)</sup>
Food Preparation and Serving Related Occupations .....	30,480	1.2	\$9.95	\$20,700
Chefs and Head Cooks.....	610	2.6	19.48	40,520
First-Line Supervisors of Food Preparation and Serving Workers.....	2,240	1.2	15.29	31,800
Cooks, Fast Food .....	920	0.8	8.81	18,330
Cooks, Institution and Cafeteria.....	900	1.0	11.07	23,030
Cooks, Restaurant.....	3,210	1.4	10.15	21,120
Cooks, Short Order.....	590	1.6	9.08	18,890
Food Preparation Workers.....	1,440	0.8	10.20	21,210
Bartenders .....	1,380	1.1	10.56	21,970
Combined Food Preparation and Serving Workers, Including Fast Food .....	8,000	1.2	8.60	17,890

Hosts and Hostesses, Restaurant, Lounge, and Coffee Shop .....	1,060	1.3	9.19	19,120

<sup>(1)</sup> For a complete listing of all detailed occupations in Charleston-North Charleston-Summerville, SC, see [www.bls.gov/oes/current/oes\\_16700.htm](http://www.bls.gov/oes/current/oes_16700.htm).

<sup>(2)</sup> Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.

<sup>(3)</sup> The location quotient is the ratio of the area concentration of occupational employment to the national average concentration. A location quotient greater than one indicates the occupation has a higher share of employment than average, and a location quotient less than one indicates the occupation is less prevalent in the area than average.

<sup>(4)</sup> Annual wages have been calculated by multiplying the hourly mean wage by a 'year-round, full-time' hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.
